### Section 1- Identification of the product and supplier

Product Name: Lithium-ion Polymer Battery

Model No.: 803035 Nominal Voltage: 3.7V

Rated Capacity: 800mAh, 2.96Wh

Manufacturer's / Supplier Name: DongGuan AUN Battery Technology CO., Ltd.

Address: No.2 Ludikeng Road, Daping Community, Tangxia Town, DongGuan, Guangdong, China

Telephone number of the supplier: +86-769-82252819 Emergency Telephone No. (24h): +86-769-82252819

E-mail address: 386729451@qq.com

Preparation Date: 2022-01-17

Inspection according to: EEC Directive 93/112/EC UN "Recommendations on the TRANSPORT OF

**DANGEROUS GOODS**"

#### **Section 2- Hazards Identification**

| Preparation hazards and classification | Not dangerous with normal use. Do not dismantle, open or shred the Battery ingredients contained within or their ingredients products could be harmful. |
|--|---|
| Apperance,<br>Color, and<br>Odor       | Solid object with no odor, no color.  |
| Primary                                | These chemicals are contained in a sealed enclosure. Risk of exposure occurs only if the  |
| Route(s) of<br>Exposure                | cell is mechanically, thermally or electrically abused to the point of compromising the   |
| LAPOSUIC                               | enclosure. If this occurs, exposure to the electrolyte solution contained within can occur  |
|  | by Inhalation, Ingestion, Eye contact and Skin contact  |
| Potential                              | ACUTE (short term): see Section 8 for exposure controls In the event that this battery  |
| Health Effects:                        | has been ruptured, the electrolyte solution contained within the battery would be   |
|  | corrosive and can cause burns.  |
|  | Inhalation: Inhalation of materials from a sealed battery is not an expected route of   |
|  | exposure. Vapors or mists from a ruptured battery may cause respiratory irritation.   |
|  | Ingestion: Swallowing of materials from a sealed battery is not an expected route of  |
|  | exposure. Swallowing the contents of an open battery can cause serious chemical burns   |
|  | of mouth, esophagus, and gastrointestinal tract.  |
|  | Skin: Contact between the battery and skin will not cause any harm. Skin contact with   |
|  | contents of an open battery can cause severe irritation or burns to the skin. Eye: Contact  |
|  | between the battery and the eye will not cause any harm. Eye contact with contents of an  |
|  | open battery can cause severe irritation or burns to the eye. CHRONIC (long term): see  |
|  | Section 11 for additional toxicological data  |
| Medical                                | Not applicable  |
| Conditions Aggravated by               |   |
| Aggravated by                          |   |

Dongguan Lepont Testing Service Co., Ltd.

| carcinogen  |                |

## **Section 3 – Composition/Information on Ingredients**

Substance or preparation: Preparation

Information about the chemical nature of product:

| Hazardous Ingredients (Chemical Name) | Concentration or concentration ranges (%) | CAS Number |
|---------------------------------------|---|------------|
| Lithium Cobalt Oxide                  | 35.5                                      | 12190-79-3 |
| Aluminum foil (Al)                    | 9   | 7429-90-5  |
| Polyvinylidene fluoride (PVDF)        | 1   | 24937-79-9 |
| Graphite (C)                          | 18  | 7782-42-5  |
| Copper Foil (Cu)                      | 15  | 7440-50-8  |
| Styrene-butadiene rubber 1500 (SBR)   | 1.5                                       | 9003-55-8  |
| Phosphate(1-), hexafluoro-, lithium   | 2.8                                       | 21324-40-3 |
| Ethylene carbonate                    | 5   | 96-49-1    |
| Dimethyl carbonate                    | 5   | 616-38-6   |
| Carbonate, methyl ethyl               | 5   | 623-53-0   |
| Nickel                                | 2.2                                       | 7440-02-0  |

Labeling according to EC directives.

No symbol and risk phrase are required.

Note: CAS number is Chemical Abstract Service Registry Number.

N/A=Not applicable.

#### Section 4 - First-aid Measures

| Inhalation   | If contents of an opened battery are inhaled, remove source of contamination or move           |  |
|--------------|--|--|
|              | victim to fresh air. Obtain medical advice.  |  |
| Skin contact | If skin contact with contents of an open battery occurs, as quickly as possible remove         |  |
|              | contaminated clothing, shoes and leather goods. Immediately flush with lukewarm, gently        |  |
|              | flowing water for at least 30 minutes. If irritation or pain persists, seek medical attention. |  |
|              | Completely decontaminate clothing, shoes and leather goods before reuse or discard.            |  |
| Eye contact  | If eye contact with contents of an open battery occurs, immediately flush the                  |  |
|              | contaminated eye(s) with lukewarm, gently flowing water for at least 30 minutes while          |  |
|              | holding the eyelids open. Neutral saline solution may be used as soon as it is available. If   |  |

Report No.: LP21120090C01-07 Page 4 of 9

Test Report Form No.: MSDS-A

|           | necessary, continue flushing during transport to emergency care facility. Take care not to |  |
|-----------|--|--|
|           | rinse contaminated water into the unaffected eye or onto face. Quickly transport victim to |  |
|           | an emergency care facility.  |  |
| Ingestion | If ingestion of contents of an open battery occurs, never give anything by mouth if victim |  |
|           | is rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth  |  |
|           | thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink 60 to 240 mL (2-8         |  |
|           | oz.) of water. If vomiting occurs naturally, have victim lean forward to reduce risk of    |  |
|           | aspiration. Have victim rinse mouth with water again. Quickly transport victim to an       |  |
|           | emergency care facility.   |  |

# **Section 5 – Fire-fighting Measures**

| Flammable  | In the event that this battery has been ruptured, the electrolyte solution contain within the |
|------------|---|
| Properties | battery would be flammable. Like any sealed container, battery cells may rupture when         |
|            | exposed to excessive heat; this could result in the release of flammable or corrosive         |
|            | materials.  |

| Suitable<br>extinguishing<br>Media         | Use extinguishing media suitable for the materials that are burning.  |
|--|---|
| Unsuitable extinguishing Media             | Not available   |
| Explosion Data                             | Sensitivity to Mechanical Impact: This may result in rupture in extreme cases   |
|  | Sensitivity to Static Discharge: Not Applicable   |
| Specific Hazards arising from the chemical | Fires involving Battery are controlled with water. When water is used, however, hydrogen gas may evolve. In a confined space, hydrogen gas can form an explosive mixture. In this situation, smothering agents are recommended to extinguish the fire |
| Protective<br>Equipment and                | As for any fire, evacuate the area and fight the fire from a safe distance. Wear a pressure-demand, self-contained breathing apparatus and full protective gear. Fight fire   |
| precautions for firefighters               | from a protected location or a safe distance. Use NIOSH/MSHA approved full-face self-contained breathing apparatus (SCBA) with full protective gear.  |
| NFPA                                       | Health: 0 Flammability: 0 Instability: 0  |

Report No.: LP21120090C01-07 Page 5 of 9

Test Report Form No.: MSDS-A

## **Section 6 – Accidental Release Measures**

| Personal Precautions, protective equipment, and | Restrict access to area until completion of clean-up.      |
|---|--|
| emergency procedures                            | Do not touch the spilled material. Wear adequate           |
|   | personal protective equipment as indicated in Section      |
|   | 8.   |
| Environmental Precautions                       | Prevent material from contaminating soil and from          |
|   | entering sewers or waterways.                              |
| Methods and materials for Containment           | Stop the leak if safe to do so. Contain the spilled liquid |
|   | with dry sand or earth. Clean up spills immediately.       |
| Methods and materials for cleaning up           | Absorb spilled material with an inert absorbent (dry       |
|   | sand or earth). Scoop contaminated absorbent into an       |
|   | acceptable waste container. Collect all contaminated       |
|   | absorbent and dispose of according to directions in        |
|   | Section 13. Scrub the area with detergent and water;       |
|   | collect all contaminated wash water for proper             |
|   | disposal.  |

## **Section 7 – Handling and Storage**

| Handling | Don't handle Battery with metalwork. Do not open, dissemble, crush or burn battery. Ensure good ventilation/ exhaustion at the workplace. |
|----------|---|
|          | Prevent formation of dust.  |
|          | Information about protection against explosions and fires: Keep ignition sources away- Do not smoke.                                      |
| Storage  | If the Battery is subject to storage for such a long term as more than 3 months, it is recommended to recharge the Battery periodically.  |
|          | 3 months: -10°C~+40°C, 45 to 85%RH  |
|          | And recommended at 0°C~+35°C for long period storage.   |
|          | The capacity recovery rate in the delivery state (50% capacity of fully charged) after storage is assumed to be 80% or more.              |
|          | Do not store Battery haphazardly in a box or drawer where they may short-circuit each other or be short-circuited by other metal objects. |
|          | Keep out of reach of children.  |
|          | Do not expose Battery to heat or fire. Avoid storage in direct sunlight.  |
|          | Do not store together with oxidizing and acidic materials.  |

Test Report Form No.: MSDS-A

## **Section 8 – Exposure Controls and Personal Protection**

| Engineering Controls          | Use local exhaust ventilation or other engineering      |
|-------------------------------|---|
|                               | controls to control sources of dust, mist, fumes and    |
|                               | vapor.  |
|                               | Keep away from heat and open flame. Store in a cool,    |
|                               | dry place.  |
| Personal Protective Equipment | Respiratory Protection: Not necessary under normal      |
|                               | conditions.   |
|                               | Skin and body Protection: Not necessary under           |
|                               | normal conditions, Wear neoprene or nitrile rubber      |
|                               | gloves if handling an open or leaking battery.          |
|                               | Hand protection: Wear neoprene or natural rubber        |
|                               | material gloves if handling an open or leaking battery. |
|                               | Eye Protection: Not necessary under normal              |
|                               | conditions, Wear safety glasses if handling an open or  |
|                               | leaking battery.  |
| Other Protective Equipment    | Have a safety shower and eye wash fountain readily      |
|                               | available in the immediate work area.                   |
| Hygiene Measures              | Do not eat, drink, or smoke in work area. Maintain      |
|                               | good housekeeping.                                      |

# **Section 9 - Physical and Chemical Properties**

| Physical<br>State                                       | Form: Solid    |                |
|---|----------------|----------------|
|   | Color: Silvery |                |
|   | Odor: Odorless |                |
| Change in cond  | dition:        |                |
| pH, with indication of the concentration                |                | Not applicable |
| Melting point/freezing point                            |                | Not available. |
| Boiling Point, initial boiling point and Boiling range: |                | Not available. |
| Flash Point   |                | Not available. |
| Upper/lower flammability or explosive limits            |                | Not available. |
| Vapor Pressure:   |                | Not applicable |
| Vapor Density: (Air = 1)                                |                | Not applicable |
| Density/relative density                                |                | Not available. |

Report No.: LP21120090C01-07 Page 7 of 9

Test Report Form No.: MSDS-A

| Solubility in Water:                  | Insoluble      |
|---------------------------------------|----------------|
| n-octanol/water partition coefficient | Not available. |
| Auto-ignition temperature             | 130°C          |
| Decomposition temperature             | Not available. |
| Odout threshold                       | Not available. |
| Evaporation rate                      | Not available. |
| Flammability (soil, gas)              | Not available. |
| Viscosity                             | Not applicable |

## **Section 10 - Stability and Reactivity**

| Stability   | The product is stable under normal conditions.  |
|---|---|
| Conditions to Avoid (e.g. static discharge, shock or vibration) | Do not subject Battery to mechanical shock. Vibration encountered during transportation does not cause leakage, fire or explosion. Do not disassemble, crush, short or install with incorrect polarity. Avoid mechanical or electrical abuse. |
| Incompatible Materials  | Not Available   |
| Hazardous Decomposition Products                                | This material may release toxic fumes if burned or exposed to fire  |
| Possibility of Hazardous Reaction                               | Not Available   |

# **Section 11 - Toxicological Information**

| Irritation                            | Risk of irritation occurs only if the cell is mechanically, thermally or electrically abused to the point of compromising the enclosure. If this occurs, irritation to the skin, eyes and respiratory tract may occur. |
|---------------------------------------|--|
| Sensitization                         | Not Available  |
| Neurological Effects                  | Not Available  |
| Teratogenicity                        | Not Available  |
| Reproductive Toxicity                 | Not Available  |
| Mutagenicity (Genetic Effects)        | Not Available  |
| Toxicologically Synergistic Materials | Not Available  |

Test Report Form No.: MSDS-A

## **Section 12 - Ecological Information**

| General note:                                 | Water hazard class 1(Self-assessment): slightly          |
|---|--|
|   | hazardous for water.                                     |
|   | Do not allow undiluted product or large quantities of it |
|   | to reach ground water, water course or sewage            |
|   | system.  |
| Anticipated behavior of a chemical product in | Not Available  |
| environment/possible environmental            |  |
| impace/ecotoxicity                            |  |
| Mobility in soil                              | Not Available  |

| Persistence and Degradability | Not Available |
|-------------------------------|---------------|
| Bioaccumulation potential     | Not Available |
| Other Adverse Effects         | Not Available |

#### **Section 13 - Disposal Considerations**

Do not incinerate, or subject cells to temperature in excess of 70°C, such abuse can result in loss of seal leakage, and/or cell explosion. Dispose of in accordance with appropriate local regulations.

## Section 14 - Transport Information

Label for conveyance: Lithium Battery Label.

**UN Number: UN3480 or UN3481** 

Packing Group: N/A EmS No.: 4.1-06 Marine polluation: No

Proper Shipping name: 1) Lithium ion batteries; 2) Lithium ion batteries packed with equipment; 3) Lithium

ion batteries contained in equipment. (including Lithium ion polymer batteries)

Hazard Classification: The goods shall be complied with the requirments of Section II (or Section IB) of Packing Instruction 965~967 of 63<sup>rd</sup> DGR Manual of IATA (2022 edition), including the passing of the UN38.3 test. And also complies with the Special Provision 188 and 230 of IMDG CODE (Amdt 40-20) Edition.

Test Report Form No.: MSDS-A

#### Section 15 - Regulation Information

#### Law information:

《Dangerous Goods Regulations》

«Recommendations on the Transport of Dangerous Goods Model Regulations»

《International Maritime Dangerous Goods》

《Technical Instructions for the Safe Transport of Dangerous Goods》

《Classification and code of dangerous goods》

《Occupational Safety and Health Act》 (OSHA)

《Toxic Substance Control Act》 (TSCA)

《Consumer Product Safety Act》(CPSA)

《Federal Environmental Pollution Control Act》(FEPCA)

《The Oil Pollution Act》(OPA)

(Superfund Amendments and Reauthorization Act Title III (302/311/313)) (SARA)

《Resource Conservation and Recovery Act》(RCRA)

《Safety Drinking Water Act》(CWA)

《California Proposition 65》

《Code of Federal Regulations》(CFR)

In accordance with all Federal, State and local laws.

#### **Section 16 – Other Information**

The information above is believed to be accurate and represents the best information currently available to us.
